Salvia - 'Vista'

The Vista series offers some of the most vibrant colors of salvia on the market. Vista purple and white are comprised of dense, well packed flower spikes with dark green foliage.

Salvia 'Vista' boasts superior plant uniformity, an excellent heat tolerance and is known to hold its color intensity throughout the season. To plant, simply prepare suitable planting holes, spread the roots as you fill in, and water well. It grows best in moist, fertile, well-drained soil. It needs at least 6 hours of sun a day for best results, and midday shade is beneficial. It is better to water once a week too deeply than to water frequently for only a few minutes. Occasional deadheading will promote continued flowering. For such a beautiful plant, Salvia is an easy to care for annual. When in need of a splash of red in your Spring garden, few plants can outdo this dramatic beauty.
